

**Please use this new method when wanting to VPN from an unsecure Network like Home / Hotel.**

### **Step 1**

Open the new "GlobalProtect" client on your work PC when you are working from home:

### **Step 2**

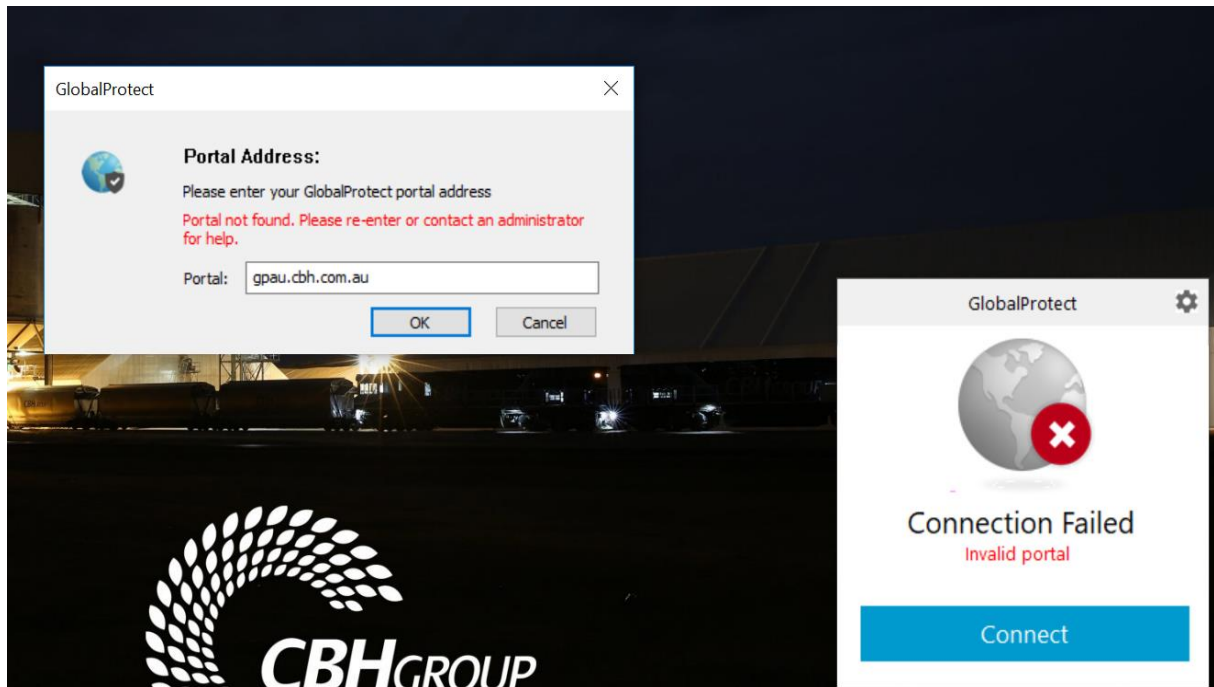

Click on connect

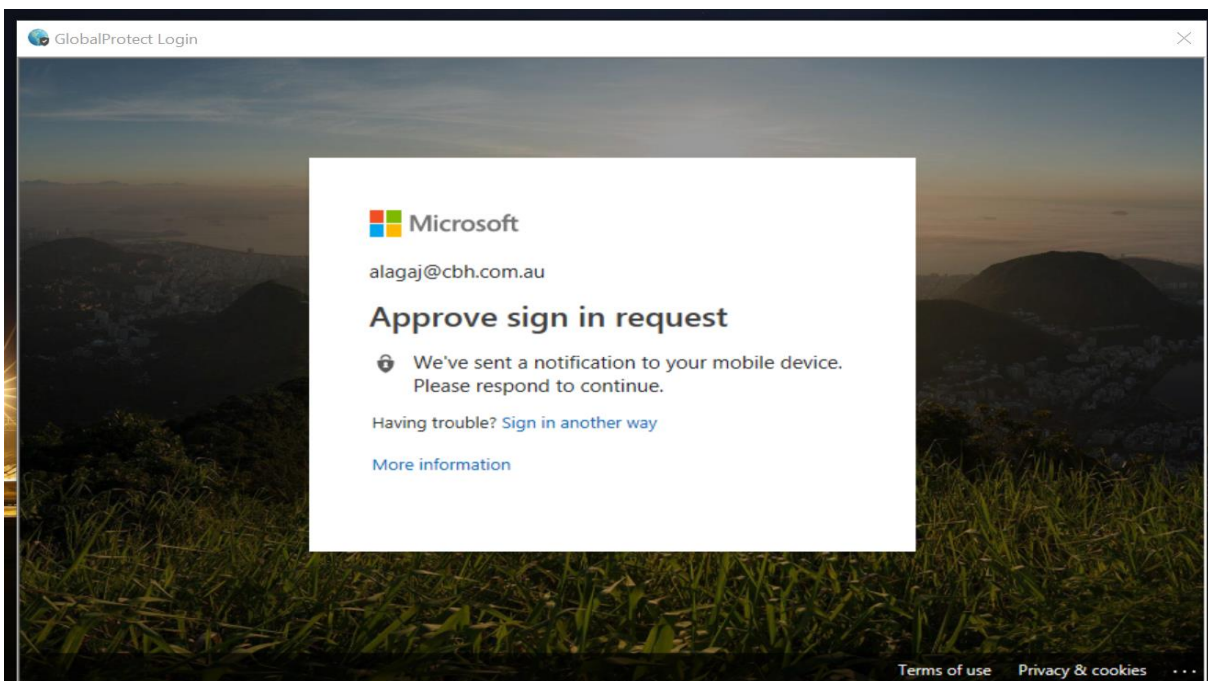

### **Step 3**

Enter "gpau.cbh.com.au". Please note the connection will fail unless the portal address is populated:

### **Step 4**

Users will be redirected to the below login screen and challenged for MFA:

### **Step 5**

If sign in was successful, you should see the below connected pop-up on the bottom right:
