

Using OfficeNet/Citrix from a home PC

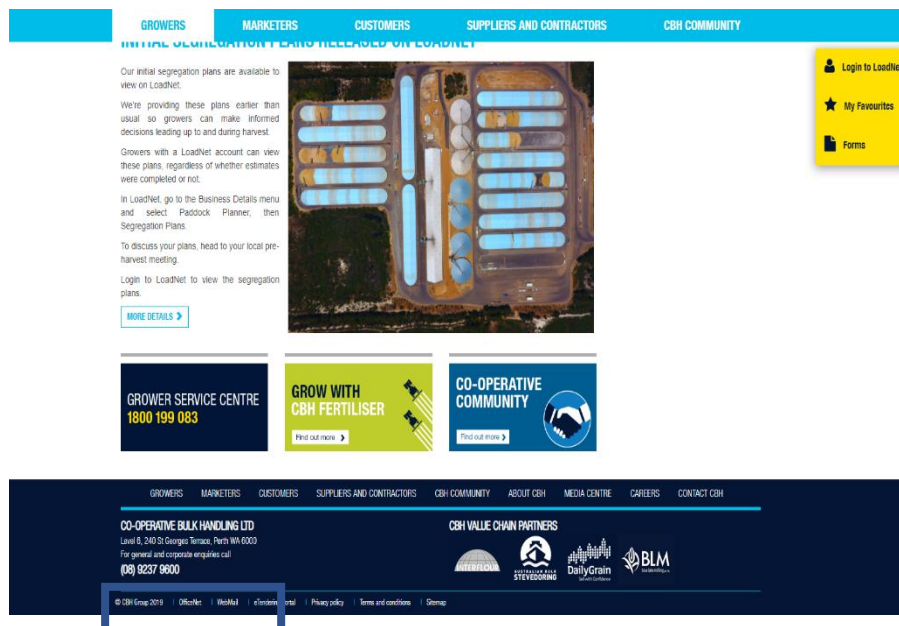

Step 1

On the home computer, go to an **Internet Browser** and go to: <https://www.cbh.com.au>

Step 2

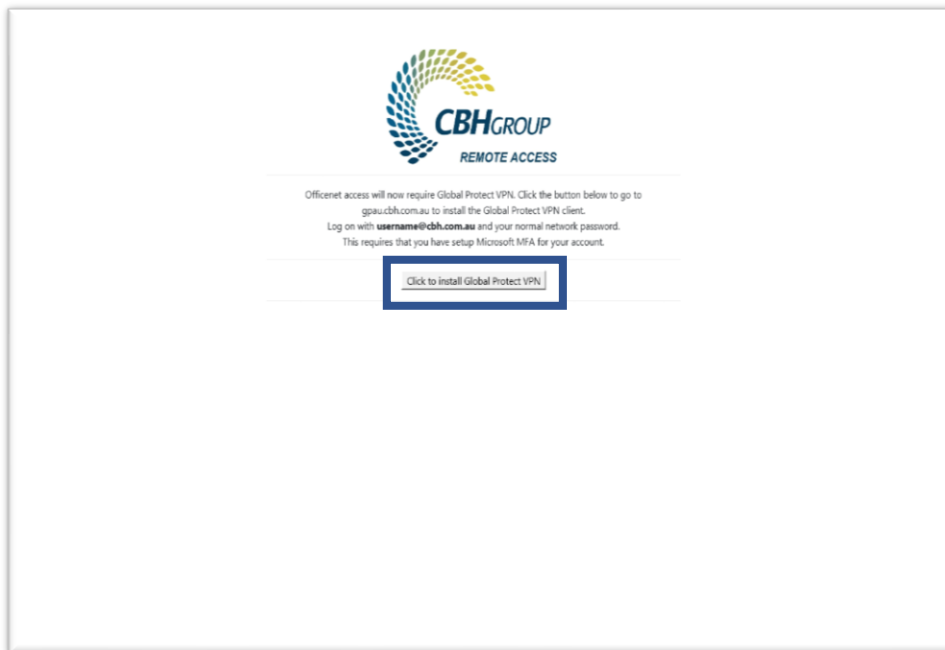

Scroll down on the CBH website, and click on **OfficeNet** at the bottom of the page:

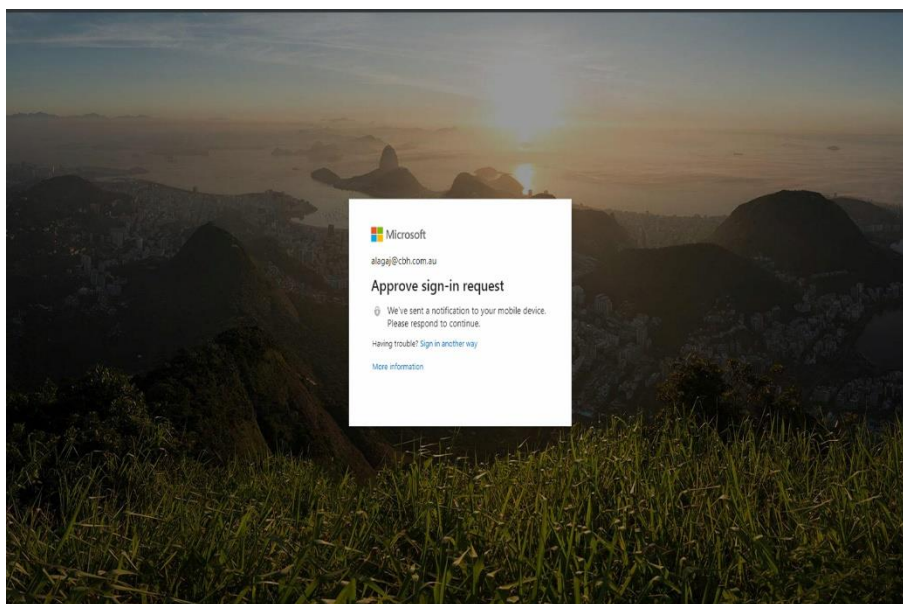

Step 3

Instead of the OfficeNet page, the following page will now be presented. Please click on the “**Click to install Global Protect VPN**” button.

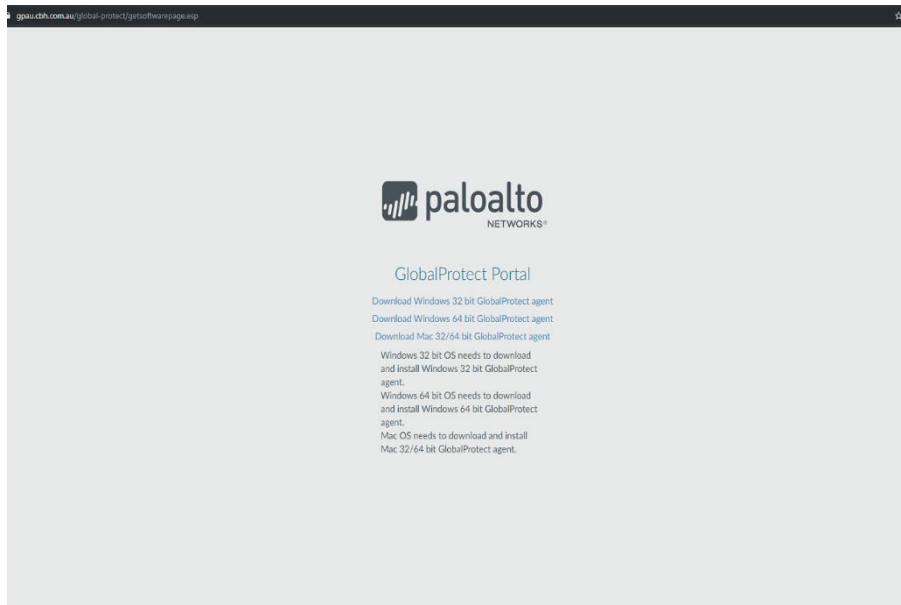

Step 4

Next, when prompted, please sign-in with your: **CBH email address, password and MFA authentication.**

Step 5

Once signed in you will see the below page (<https://gpau.cbh.com.au>), from which you can download and install the **Global Protect client** on to your home computer:

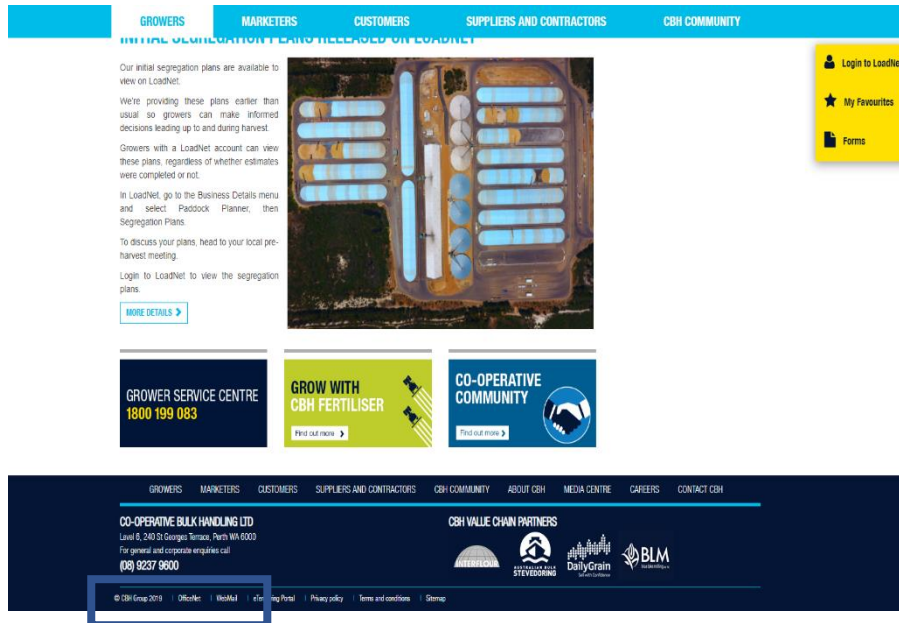

Once you have completed the installation, follow the **“New VPN User Guide (Global Protect or watch the attached video)”**

DO NOT PROCEED TO THE NEXT STEP UNTIL GLOBAL PROTECT IS INSTALLED AND SIGNED IN on the PC.

Step 6

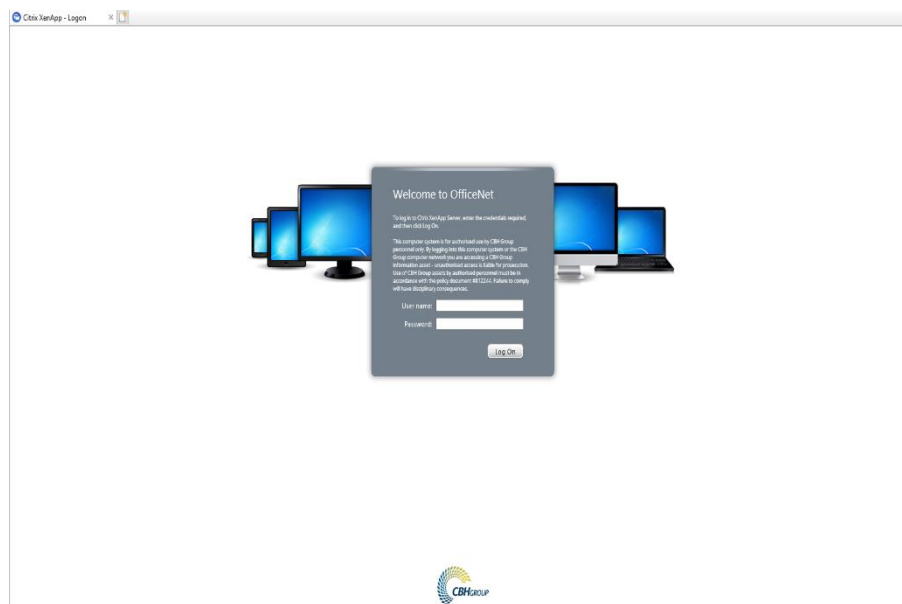

Once you have successfully logged into the **Global protect VPN client** (on the home PC), return to the bottom of the CBH website and click on the **OfficeNet** link:

That same link, will now be re-routed to the CBH OfficeNet page.

Step 7

Sign-in to OfficeNet as you would in the office with **username** and **password**:

Step 8

Once you're done with OfficeNet, close all OfficeNet sessions and Internet Browser. Go to the System Tray and locate **Global protect VPN client**. Click **Disconnect** to terminate all VPN sessions.
